SKILLS

- | | |
|---------------------------|---|
| • Languages: | Python, C, C++, Java, HTML, CSS, JavaScript |
| • Frameworks: | TensorFlow, PyTorch, Hugging Face Transformers, Keras, Scikit-learn |
| • Tools/Platforms: | Linux, Git, GitHub, Docker, DevOps, VS Code, Jupyter Notebook |
| • Soft Skills: | Problem-Solving, Team Collaboration, Time Management |

TRAINING

GeeksforGeeks Data Structures and Algorithms - Self Paced	June 2024 - July 2024
--	------------------------------

- **About:** Completed an in-depth training program on data structures and algorithms, covering arrays, linked lists, stacks, queues, trees, graphs, dynamic programming, and sorting/searching algorithms.
- Gained hands-on experience in problem-solving and coding implementations using C++.
- **Tech:** Python ,C++

PROJECTS

• AI-Powered Chatbot	January 2025 - April 2025
-----------------------------	----------------------------------

- Developed an AI conversational assistant using Google Gemini LLM, Flask, and JavaScript, capable of understanding natural language and generating context-aware responses across multiple domains.
- Designed and deployed a full-stack AI chatbot architecture using Flask REST API + modern responsive UI (HTML/CSS/JS) with animated messaging and voice output for enhanced UX.
- Integrated robust error handling, retry logic, and fallback model switching, significantly improving reliability during API overload and quota fluctuations.
- Demonstrated strong capability to merge AI/ML, backend API development, and frontend engineering into a scalable, production-ready solution.
- **Tech:** Python,NLP,LLM REST Framework, SQLite, HTML, CSS, RESTful APIs
- [Project Link](#)

• Stock Price Prediction	September 2024- November 2024
---------------------------------	--------------------------------------

- Designed and implemented a deep learning model using LSTM networks to predict Apple stock prices.
- Performed comprehensive data processing, including filtering, normalization and sequence generation for time series input.
- Trained and validated the LSTM model to forecast future closing prices with high accuracy, achieving a low RMSE on the test set.
- Applied real-time evaluation metrics (MSE, RMSE) and plotted actual vs. predicted prices to assess prediction accuracy and model robustness.
- **Tech:** Python, LSTM, TensorFlow,Pandas,Feature scaling (MinMaxScaler)
- [Project Link](#)

CERTIFICATIONS

- | | |
|---|--------------------|
| • Cybersecurity (Udemy) | April 2025 |
| • Self-paced DSA (GeeksForGeeks) | July 2024 |
| • Programming C++ (Coursera) | August 2024 |

EDUCATION

- | | |
|--|--|
| • Lovely Professional University
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.19 | Phagwara, Punjab
August 2022-present |
| • Samastipur College Samastipur
Intermediate (Science Stream with Computer Science); Percentage: 72% | Smastipur, Bihar
April 2018 - March 2019 |
| • D.M.P Holy Mission
Matriculation; CGPA: 9.8 | Samastipur, Bihar
April 2016 - March 2017 |
